### **REASONS FOR ALLOWANCE**

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 5,007,543 to Cooke. The improvement comprises a hydraulic driving device with a controller adapted to stop the pump, and close the open and closed valve and the hydraulic control valve respectively when the output value of the operating device is in a first predetermined range, start the pump and open the open and closed valve when the output value goes beyond the first predetermined range, and open the hydraulic control valve to supply the hydraulic fluid to the actuator when the output value goes beyond a second range, greater than the first predetermined range for the purposes of suppressing the shock caused by hydraulic variations at the time of starting the pump.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **PRIOR ART**

The patent to Cooke is cited for the showing of a hydraulic driving device similar to applicant's but lacking the controller operational limitations.
